May 26, 2016

Dear ITT Conoflow<sup>®</sup> Distributor,

ITT Control Technologies is pleased to announce the sale of the \*Conoflow<sup>®</sup> GP50/P50 Series pneumatic valve positioner product line to WTM Valves & Services (a.k.a. Wright Technical Marketing, LLC). Please note that this announcement pertains to the GP50/P50 product line only. The acquisition was structured as an asset purchase, with WTM being responsible for the production, marketing, sales and support of the GP50/P50 positioner product line moving forward.

The \*Conoflow<sup>®</sup> GP50/P50 Series is a fully mechanical pneumatic positioner product line that has been utilized worldwide for many decades in the power, process, and oil & gas industries.

The GP50/P50 product line will be manufactured by WTM in their facility located in Lewisburg, PA. Production is scheduled to resume by mid-2016. WTM will market the GP50/P50 product line under the WTM brand. However, the product will retain the Conoflow<sup>®</sup> design and model numbering system.

The acquisition of the GP50/P50 product line will provide a means of support to existing users of GP50/P50 positioners across all industries, as well as representing an option for new customers seeking a rugged and time-proven, fully-mechanical pneumatic valve positioner.

WTM has been in business since 2002, supplying Koso Hammel Dahl control valves, actuators, related accessories, and engineering services, primarily to the nuclear power industry. The principal of WTM has over (30) years of experience in the valve and actuator business.

For additional information, please contact WTM at the following address:
